# WHO WE ARE

Xport Group is an acknowledged and ambitious leader who focuses on marketing and trading in the wide-ranging field of construction, building and fit outs supplies.

For over two decades we have been connecting, improving and empowering the rapidly growing and sophisticated demands of the Middle East (ME) and GCC to the European products and manufacturing entities. We have taken part to the accomplishment of the architectural icons of the region.

Headquartered in Dubai. Which is the perfect Hub to embrace the ME and the entire Arabian Peninsula to the worldwide-recognized EU Quality Standards. Our extensive portfolio specifically showcases the celebrated "Made in Italy" that is well known for its unique Design and Creativity. We represent over 1 billion euro of the total TO of the Made in Italy in the region.

Our multicultural origins along with our established presence in the Middle East and in the GCC, gave us the chance to be at the right place at the right moment.

We fulfil the requests of the most demanding architects, developers and contractors in the GCC (UAE, Saudi Arabia, Qatar, Kuwait Oman and Bahrain) and all over the ME.

To the most innovative requests, we never failed to provide multiple original solutions, smart designs and exclusive EU standard certified quality products matched by the necessary local pre-qualification in order to be effective and operational on the spot.

Throughout the ME and GCC we are perceived with trust and reliance that we never failed to validate and strengthened over the years.

# MISSION & VISION

Our business approach is sharply marketing oriented. We target to identify the most innovative architectural trends and satisfy the challenging needs and calibres of local consultants, developers and architects throughout a wide geographical area with different and similar cultural features as the Middle East and GCC.

We represent exclusively EU certified companies with proven worldwide references.

All our products of all different categories are ready to be used on regional projects having been previously pre-qualified by local authorities and therefore easily locally accessible from the constructors.

Our personnel, a group of multicultural professionals engineers Italian-English-Arabic speaking, are able to give a fair and clear picture of the wide and prosperous market in which we are operating and a "tailor made "proposal from our "Made in Italy" partners.

Our team performs as a real "trade-union" between our Italian partners, their product development department and the demanding reality of the region in terms of safety, quality and design.

# STRATEGY

Our marketing strategy of horizontal trading entity combines all its marketing goals into one comprehensive plan.

We strongly believe a good marketing strategy should be drawn from a keen market research to grasp the most innovative and newest trends from the Made in Italy, empower our range to make it wider and wider to fulfil the ambitious development plans of the region.

Thanks to our well-monitored and locally spread strategy, we are proud to state that we have been delivering our promises to our partners for over 20 years.

Our Marketing research counts on a solid and proven "data base" of contacts and data collection from our partners and our team along with the ever changing market trends monitoring and advancing how they are shifting to.

We have been partners of the most ambitious projects and landmarks in UAE, GCC and Middle East, both private and public, supplying original Designs and the most advanced fit outs.

## BERTANI S.p.A. MILESTONES

**1916** The business opened under the name Bertani Amedeo as a small shop in the centre of Reggio Emilia that retailed sanitary products.

---

**1916-1967** The business's ownership passed down to the founder's heirs and it expanded, moved its headquarters and changed its name to Bertani s.n.c.

---

**1981** The first small showroom was opened.

---

**1989** Moved to 5,000 sqm surface current Head Quarter.

---

**1994** The first branch was opened in Parma.

---

**1996** The new showroom was built near the Headquarters.  
Bertani became a Joint-Stock Company.  
Its second branch opened in Modena.  
The Intesa Srl Company was founded with 5 other retailers of sanitary and heating materials active in different parts of northern Italy.

---

**1999** The company was certified ISO 9002 Quality System by DET NORSKE VERITAS.  
Later in 2005 the certification was extended to the ISO 9001/2000 standard.

---

**2000-2009** New branches opened: Sassuolo-Mirandola-Sardinia-Pavullo-Fidenza-Alghero-Calerno and Viadana.  
Bertani S.p.A. wins the best showroom Award 2009 during a ceremony at Cersaie in the class "Best Service to Customers".

---

**2010** Bertani S.p.A. gets SOA certification- Statement of qualification for execution of public contracts-Category 06 Class III.  
First POS outside Italy: Bertani London Ltd.

---

**2011** Bertani S.p.A. opens up Online Sales in Italy, Switzerland, Germany, Spain, Eastern Europe and Taiwan.

---

**2012** Bertani S.p.A. opens in UAE through Xport Group its Marketing Middle East branch in Dubai.

---

**2014** First Showroom in Abu Dhabi.

---

**2015** Bertani's expansion in the GCC is testified by a new opening in Doha-Qatar.

## APPLICATIONS

**SUITABLE FOR MANY INDOOR AND OUTDOOR APPLICATIONS:**

**Construction Industry:**

Floor and wall coverings, partition and storage walls, false ceilings, surface finishes and restoration, insulated panels, tunnels and undergrounds.

**Façade Cladding Systems:**

Ventilated façades, coatings, external claddings.

**Interior Design:**

Surfaces of kitchen and bathroom tops, cupboards, tables, desks, doors and furnishings in general.

**Shipbuilding Sector:**

The lightness and high technical properties make it suitable for floors and walls of cruise and sports crafts.

**Composite and Structural Panels:**

The slabs can be placed on top of each other or over other materials to create extremely light and particularly resistant composite and structural panels suitable in all those cases that require high resistance and reduced weight load on the surface.

The background of the page is a close-up photograph of a marble surface. It features a light cream or off-white base color with intricate, flowing veins in shades of pale pink, rose gold, and light beige. The veins vary in thickness and direction, creating a complex, organic pattern. The lighting is soft, highlighting the natural texture and subtle color variations of the stone.

## FRONTAL INSTALLATION

Suggested for Windows and French doors

## LATERAL SLIDING

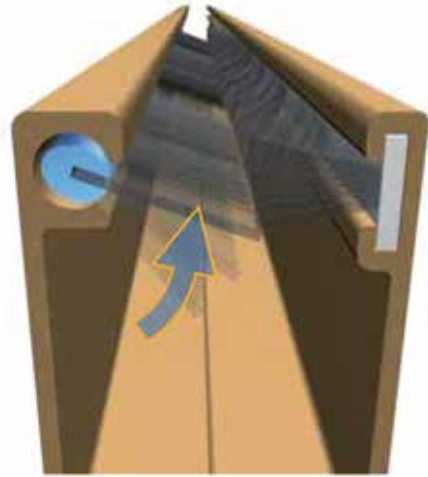

Suggested for French doors

## THE BRAKE

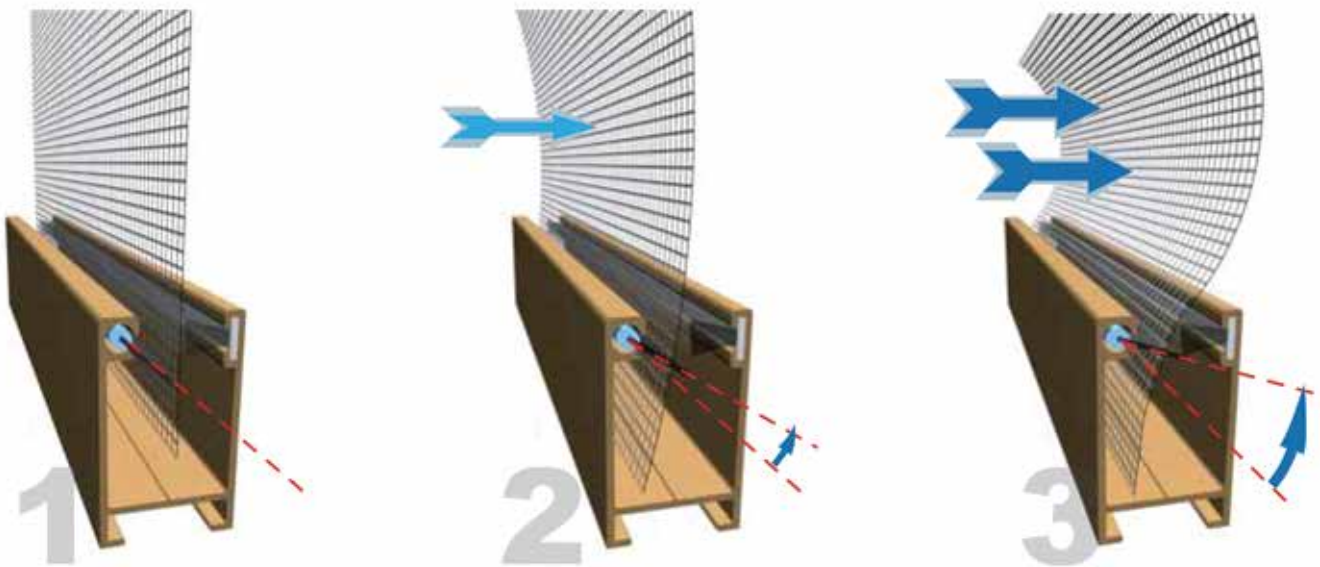

A brand new device has been added to the already rich range of possibilities that Adriatico Evolution allows. Thanks to the slow and gradual retraction allowed by this element, the pull bar can be easily unlocked at any time feeling an automatic and soft open-and-close movement.

## ANTI-WIND BRUSH

A worldwide known international patent. The system is based on a special extruded profile where a circle groove is arranged for a particular thick and long brush. In presence of a strong wind the brush turns within the groove because the piles and lift and trapped by the mesh which remains locked in the guide without ejecting.
